

DEPARTMENT PLAYBOOK

Accounts Team

Your playbook for money in Agrocorp CRM — bookings, payments, collections, ageing and demand letters. For Accounts Head and Accounts Support.

Accounts Head

Accounts Support

User Manual · Find your task in the contents and follow the numbered steps.

Who this guide is for

ROLE	WHAT YOU DO	ACCESS
Accounts Head	Owns collections & post-sales money	View and manage accounts, post-sales; can verify, edit and take actions
Accounts Support	Assists with accounts tasks	View only – can see accounts and leads, but cannot edit, delete or approve

Difference in one line: the **Head** can verify payments and take actions; **Support** can view and help but not change or approve.

Your home screen

The screenshot shows the Agrocorp CRM dashboard. On the left is a sidebar with navigation links: Overview (selected), Tasks, Sales (Leads, Pipeline, Call List, Site Visits, Inventory, Import), Deals & Finance (Bookings, Collections, Demand Letters), and Messaging (WhatsApp Inbox). The main content area is titled 'Dashboard' and 'Collections Overview'. It shows four key metrics: Collections Due (₹0 outstanding), Overdue (₹0 past due date), Received This Month (₹0 collected), and Pending Demand Letters (0 awaiting action). Below these is a table titled 'Upcoming & Overdue Payments' with columns: Customer, Milestone, Amount Due, Due Date, and Status. The table is currently empty, showing 'Nothing here yet'. At the bottom left, there's a user profile for Meena Rao (Accounts Support) and a Dark mode toggle.

Accounts dashboard – a **Collections Overview**: money due, overdue and received this month, pending demand letters, plus a table of upcoming and overdue payments.

Your day mostly lives in three screens: **Bookings**, **Collections** and **Demand Letters** (all under *Deals & Finance*).

TASK 1 – Review bookings and token payments

Bookings — total deal value, confirmed count and token collected.

- 1 Open **Deals & Finance** → **Bookings**.
- 2 Read the top summary: **Total deal value**, **Confirmed bookings** and **Token collected**.
- 3 Scan the table — each row shows the booking reference, customer, deal value, token and **status** (Confirmed, Form sent, Cancelled).
- 4 Click a booking to open its full record.
- 5 Check that the **token** shows as *paid* for confirmed deals.

TASK 2 — Record and verify a payment

- 1 Open the booking (Task 1) or the customer's record.
- 2 Click **Add payment / Record receipt**.
- 3 Enter the **amount**, **date** and **mode** (cheque, transfer, UPI...).
- 4 Enter the **reference number** (transaction/UTR/cheque no.).
- 5 Click **Save**.
- 6 Open the payment and click **Verify / Reconcile** once the money is confirmed in the bank.
- 7 A **receipt** is generated for the customer.

Support staff: you can view all of this but the **Verify** and edit actions are done by the Accounts Head.

TASK 3 – Track collections and ageing

Collections – collected vs scheduled vs outstanding, with an ageing strip.

- 1 Open **Deals & Finance** → **Collections**.
- 2 Read the three big numbers: **Collected**, **Scheduled** and **Outstanding**.
- 3 Look at the **Ageing of receivables** row – Current, 0–30, 31–60, 61–90, 90+ days.
- 4 Scroll to **Overdue milestones** to see exactly which bookings owe money and by how long.
- 5 Prioritise the oldest overdue amounts first.

Why ageing matters: anything drifting into 60+ days needs a call or a demand letter. Use this screen to decide who to chase today.

TASK 4 – Raise and manage demand letters

Demand Letters – total due, escalated and settled, with a full letter list.

- 1 Open **Deals & Finance** → **Demand Letters**.
- 2 Read the top summary: **Total due**, **Escalated** and **Settled**.
- 3 To raise a new one, click **New demand letter** (or the action on an overdue milestone).
- 4 Pick the **booking / milestone** the demand is for.
- 5 Check the **amount** and any **interest** the system has added for the delay.
- 6 The letter gets a unique **serial number** automatically.
- 7 Click **Generate / Send**.
- 8 When the customer pays, open the letter and mark it **Settled**.

Escalation: letters that stay unpaid move to **Escalated** so nothing is forgotten.

TASK 5 – Allotment at 10% collection

- 1 The CRM tracks how much a customer has paid against their deal.
- 2 Once collections reach **10%**, the system **triggers allotment** for that booking.
- 3 Coordinate with the Legal team, who take the agreement forward from there.

Quick answers

QUESTION	ANSWER
Where do I see who owes money?	Collections → Overdue milestones, sorted by how long overdue.
How is interest calculated?	The system adds it automatically on late demand letters.
I can only view, not edit	You're on the Support role — the Accounts Head verifies and edits.
A payment shows unverified	Open it and click Verify once the bank confirms the money.
